TECHNICAL INFORMATION

The needs of contemporary living and of versatile furnishings find expression in the Feudo coffee table, a constructive combination of simple and sculptural geometric shapes. The top is a disc, while the base is composed of two symmetrically superimposed truncated cones. Shapes reminiscent of the analytical and pure cubism, of the theatrical expressiveness of the Bauhaus and of the plastic dynamism of the futurism, made up of bright sounds and percussion that evokes speed and aerodynamic lines.

The circular movement of the large disc top, hinged on the central screw-trunk of the base, allows the top to be isometrically lowered and raised to find the desired height.

PRODUCT DETAILS

Generously sized round coffee table composed by two opposing cones in natural-stained solid ashwood. In the upper cone there is a metal threaded bar that screws into the lower cone in order to raise the table by about 18cm. Available with open-pore stone white travertine top or with 2cm thick glossy white lacquered MDF top.
